- Torque Wrench
- Hard Carrying Case
- (4) Low PIM Terminations 301L-200-D43F
- Cleaning Tool, Qty. 10
- (10) Isopropyl Alcohol Towelette

## Description

The 4.3/10 miniDIN Load Kit provides everything needed to terminate four radio ports simultaneously at a cell site to evaluate PIM performance using the site radio. The kit includes 4x Innowave 200W low PIM terminations plus all required test accessories in a convenient padded transit case.

External PIM Hunting training, incorporating ConcealFab's Absorber Kit System and this Load Kit is offered for \$795 per student at Avalon's office in Irving, TX or Carlsbad, CA. On-site training can be arranged for a \$950 per student (minimum 8 students.) Contact [kburnham@avalontest.com](mailto:kburnham@avalontest.com) for more information.

Wrenches are the only calibrated items. PIM verification testing is performed on terminations, connector savers, and test cables.

## Price

- Price: \$5,499 each
- Kit price (with training purchase): \$5225
- Rental Price: \$825/month
- Kit price includes one free torque wrench calibration and PIM verification of RF components.
