

# **SMCC Series**

### MAIN FEATURES

- Intuitive user interface
- Rugged Modular Design Construction
- USB, Ethernet, GPIB and RS232 interface
- Built in Calibrated Directional Coupler
- 3 year warranty

Instruments for Industry, SMC Series Solid State amplifiers provide outstanding RF performance. Operating over the fre¬quency range from 200 MHz to 1.0 GHz and can be supplied at power levels up to 2000 watts offering all the control and communication features needed for today's automated test systems. From the ground up, the SMCC Series amplifiers are built to withstand rugged handling, whether it's being shipped to you or hauled around from site to site.

Operation safety and ease of use are paramount in IFI product designs. The IFI SMCC Series include a full complement of RF and hardware protection circuits including high VSWR, over-current, voltage protection, redundant thermal and airflow sensors for the module and system level. In addition, the SMCC series includes an intuitive interface that is sophisticated, comprehensive, and yet simple to use. The color interface displays forward/reverse power indication, system status and self-diagnostic information. All the amplifiers operating parameters are simultaneously available via the interface as well as over the remote bus. Selection via the interface allow you to switch the ampli-fier to the desired mode of operation for local control if the unit is not being operated remotely.

For remote control operation USB, Ethernet, GPIB and RS232 interface are provided as standard. To meet individual application needs, the SMCC Series amplifiers can be easily customized with other options. With this capability and its reliable design, the SMCC series amplifiers are the perfect system for your applications.
